Question # 4

These Members are being invited as part of a bipartisan Congressional delegation to NYC Climate Week, and it will foster cross-party collaboration on climate solutions, showing that climate action is not a partisan issue but a shared national priority. Their presence underscores the importance of federal leadership, helps build consensus on practical policy approaches, and creates opportunities for dialogue with local leaders, businesses, and communities. This engagement can accelerate the development of balanced, durable legislation that reflects a wide range of perspectives and drives real progress on climate resilience and clean energy.

Question # 12

The Climate Solutions Foundation (CSF) was founded in 2019 as an educational, bipartisan 501(c)(3) non-profit organization. Our mission is to bring together ideologically diverse Members of Congress and their staff, global leaders, and corporate and trade executives to discuss climate science, economics, and policy. The Climate Solutions Foundation hosts a series of bipartisan, bicameral gatherings of members of Congress, congressional staff, executives, and scientists to build trust within the climate change community and inspire collaborative efforts to advance the agenda on climate change. Since then, CSF has expanded its programming to include domestic educational trips, international trips to the UN's (COP) convenings, congressional staff briefings, receptions, and a congressional fellowship program. The Climate Solutions Foundation is solely responsible for organizing and planning all aspects of the trip.

Question # 15-2

Participating with a bipartisan group of Members during NYC Climate Week is beneficial for Climate Solutions Foundation because it demonstrates a unified commitment to addressing climate change beyond political lines. This collaboration enhances credibility, broadens support for climate policies, and helps advance pragmatic, widely supported solutions. Engaging with diverse stakeholders also fosters more durable, inclusive climate action—key to building long-term momentum for clean energy and sustainability efforts. NYC Climate Week is in NYC, and it coincides with the United Nations General Assembly meeting and aims to bring leaders together to discuss climate issues

Question # 4

These Members are being invited as part of a bipartisan Congressional delegation to NYC Climate Week, and it will foster cross-party collaboration on climate solutions, showing that climate action is not a partisan issue but a shared national priority. Their presence underscores the importance of federal leadership, helps build consensus on practical policy approaches, and creates opportunities for dialogue with local leaders, businesses, and communities. This engagement can accelerate the development of balanced, durable legislation that reflects a wide range of perspectives and drives real progress on climate resilience and clean energy.

Question # 12

The Climate Solutions Foundation (CSF) was founded in 2019 as an educational, bipartisan 501(c)(3) non-profit organization. Our mission is to bring together ideologically diverse Members of Congress and their staff, global leaders, and corporate and trade executives to discuss climate science, economics, and policy. The Climate Solutions Foundation hosts a series of bipartisan, bicameral gatherings of members of Congress, congressional staff, executives, and scientists to build trust within the climate change community and inspire collaborative efforts to advance the agenda on climate change. Since then, CSF has expanded its programming to include domestic educational trips, international trips to the UN's (COP) convenings, congressional staff briefings, receptions, and a congressional fellowship program. The Climate Solutions Foundation is solely responsible for organizing and planning all aspects of the trip.

Question # 15-2

Participating with a bipartisan group of Members during NYC Climate Week is beneficial for Climate Solutions Foundation because it demonstrates a unified commitment to addressing climate change beyond political lines. This collaboration enhances credibility, broadens support for climate policies, and helps advance pragmatic, widely supported solutions. Engaging with diverse stakeholders also fosters more durable, inclusive climate action—key to building long-term momentum for clean energy and sustainability efforts. NYC Climate Week is in NYC, and it coincides with the United Nations General Assembly meeting and aims to bring leaders together to discuss climate issues

About the Climate Solutions Foundation (CSF): CSF was founded in 2019 as an educational, bipartisan 501(c)(3) non-profit organization. Our mission is to bring together ideologically diverse Members of Congress and their staff, global leaders, and corporate and trade executives to discuss climate science, economic security, and policy. Foundation Co-Chairs Hon. Mary Landrieu and Hon. Carlos Curbelo launched the Foundation in 2019 with a series of bipartisan, bicameral gatherings of Members of Congress, executives, and scientists at Senator Landrieu's dining room table with one purpose: to build trust within the climate change community that inspires collaborative efforts to advance bipartisan action on climate. Since then, CSF has expanded its programming to include domestic educational trips, international trips to the United Nations Conference of Parties (COP) convenings, congressional staff briefings, receptions, and a congressional fellowship program.

About New York City Climate Week (NYCW): NYC Climate Week (NYCW) brings together global leaders to advance new ideas, insight and solutions to the biggest challenges facing the future of energy, the environment, climate, and security. It is the largest US-based annual climate event of its kind, featuring more than 900 in-person, hybrid, and online events across the city. Each year, business leaders, policymakers, local officials, and civil society representatives from around the world come together to discuss the global energy transition, highlight progress, and develop partnerships that drive meaningful change.

CSF's Programming: This year marks the first time CSF has been able to bring Members to New York Climate Week, made possible by the House schedule. Member programming will feature roundtables, receptions, and dinners with corporate partners, government officials, and international allies, focused on domestic and global energy issues. Discussions will highlight pragmatic opportunities in energy, innovation, trade, security, and bipartisan pathways forward. Our allies and partners are especially eager to engage in permitting reform and the deployment of clean, firm technologies to meet growing energy needs. Your presence will be foundational in shaping the perspectives of corporate leaders and international partners as they prepare for the United Nations Framework Convention on Climate Change in Brazil
