Attachment 2 – Question #12 – Sponsor’s interest and role

Software.org, the BSA Foundation is an independent and nonpartisan 501(c)(3) research organization that helps policymakers and the broader public better understand the impact that software has on our lives, our economy, and our society. We believe that by working together to examine these issues we can better prepare for the future and help shape government policies and industry culture that will promote both technological advancement and widespread growth.

Software.org seeks to take Congressional staff on an educational tour of global software companies at their Seattle area facilities. We have invited staff whose Members serve on the Energy and Commerce, Homeland Security, Judiciary, Science, Space & Technology Committees, and Financial Services Committees, or are in House Leadership offices, in order to educate them about the software industry and issues of importance to the industry, including its economic impact, the need for computer science education, trade, privacy, intellectual property rights, digital transformation across industry sectors, and other issues. Software.org planned and organized all aspects of the trip, made lodging and travel arrangements, and corresponded with businesses involved to set up events and tours at each location. Software.org is the sole sponsor for this trip, including responsibility for covering cost of meals throughout the trip.

Attachment 3 – Question #15(b)(2) – Reason for selecting location of the event or trip

Seattle, Washington was selected due to the number of software companies with major offices located in close proximity to one another. This allows Software.org to efficiently share insight into the software industry through in-depth, on-premises conversations with a variety of industry experts.
