COMMITTEE ON ETHICS

Washington, DC 20515

September 13, 2022

Mr. Anthony Falcone
Office of the Honorable Katie Porter
2151 Michelson Drive, Suite 195
Irvine, CA 92612

Dear Mr. Falcone:

Pursuant to House Rule 25, clause 5(d)(2), the Committee on Ethics hereby approves your proposed trip to Los Angeles, California, scheduled for September 16, 2022, sponsored by Clean Fuels Alliance Foundation (F/K/A National Biodiesel Foundation), Ag Processing, Inc, Clean Fuels Alliance America, Hero BX, Incobrasa Industries, Ltd., Minnesota Soybean Processors, Renewable Biofuels, Renewable Energy Group, Western Dubuque Biodiesel, LLC, and Western Iowa Energy, LLC. We remind you that, because the trip sponsor employs a federal lobbyist, you may participate in officially-connected activity on one calendar day only.

You must complete an Employee Post-Travel Disclosure Form (which your employing Member must also sign) and file it, together with a Sponsor Post-Travel Disclosure Form completed by the trip sponsor, with the Clerk of the House within 15 days after your return from travel. As part of that filing, you are also required to attach a copy of this letter and both the Traveler and Primary Trip Sponsor Forms (including attachments) you previously submitted to the Committee in seeking pre-approval for this trip. If you are required to file an annual Financial Disclosure Statement, you must also report all travel expenses totaling more than \$415 from a single source on the "Travel" schedule of your annual Financial Disclosure Statement covering this calendar year. Finally, Travel Regulation § 404(d) also requires you to keep a copy of all request forms and supporting information provided to the Committee for three subsequent Congresses from the date of travel.

If you have any further questions, please contact the Committee's Office of Advice and Education at extension 5-7103.

Sincerely,

A handwritten signature in blue ink, appearing to read "Theodore E. Deutch".

Responses to Questions 9, 15

Question 9 d

I checked 8(c) above and am offering lodging and meals for two nights. If you checked this box, explain why the second night of lodging is warranted:

The tour begins at 7:30am and runs until 6:00pm PT on Sept. 16. Participants originating in Washington DC, will arrive the night of Sept. 15, participate in the tour on Sept. 16 and return home Sept. 17. As the tour ends late, return flights are very late (pacific time). Due to the event being on the West Coast and travelers returning to the East Coast, participants fly home early on Saturday, Sept 17.

Question 15 b (2)

Provide the reason for selecting the location of the event or trip:

California is a key state for the biofuel market because of the California Air Resources Board (CARB) and its programs. Los Angeles was chosen because several of the tour's speakers are within proximity of each other and the airport. The area also features several biodiesel plants to visit.

ATTACHMENT D

12. For each sponsor required to submit a sponsor form, describe the sponsor's interest in the subject matter of the trip and its role in organizing and/or conducting the trip:

Each tour sponsor is directly involved in the production and/or distribution of biodiesel, renewable diesel, and/or sustainable aviation fuel. The tour provides participants with a better understanding of the environmental and economic impacts of biodiesel and Bioheat® and supports each sponsor's efforts to create a positive legislative environment. Sponsors have made financial contributions to the trip and have been part of organizing and conducting the trip.

Clean Fuels Alliance Foundation works closely with the Clean Fuels Alliance America to address issues affecting the nation -- cleaner air, greater economic development for rural communities, and enhanced national security through energy independence. Organized in 1994, the Foundation's mission is to accomplish outreach, education, research, and demonstration activities for the advancement of biodiesel and its co-products to improve rural economic development, national security, air quality and the environment. **The Foundation is the primary tour sponsor and has overall responsibility for planning, organizing, and implementing the tour.**

Clean Fuels Alliance America. Representing biodiesel, renewable diesel, and sustainable aviation fuel, Clean Fuels Alliance America advances the interests of its members by supporting sustainable biodiesel, renewable diesel, and sustainable aviation fuel industry growth. Clean Fuels serves as the industry's central coordinating entity for technical, environmental, and quality assurance programs and is the strongest voice for its advocacy, communications, and market development. **Clean Fuels has assisted with coordinating the tour and will be presenting during the tour.** Their lobbyist had no more than *de minimis* involvement in the planning, organizing, requesting, or arranging the trip.

Ag Processing, Inc (AGP) is a leading U.S. agribusiness with primary operations as a soybean processor/refiner producing and marketing soybean meal, refined soybean oil, and biodiesel. AGP's commitment to the biodiesel industry dates back more than two decades with its pioneering efforts to develop a new market for soybean oil. The cooperative built the first commercial-scale U.S. soy biodiesel plant in 1996 in Sergeant Bluff, Iowa. AGP's operations today consist of three biodiesel production plants (Algona and Sergeant Bluff, Iowa, and St. Joseph, Missouri) with a combined annual capacity of 175 million gallons. As a leading advocate for the establishment of industry quality standards, AGP continues to produce the highest quality biodiesel product available, receiving BQ-9000 certification of its biodiesel production. **AGP has contributed to tour planning and will participate on the tour.**

HERO BX is one of the top ten biodiesel production facilities in the nation. Located on Lake Erie, the company is a major supplier of biodiesel to the north-east corridor including New York City. The HERO BX mission is to be a reliable producer and distributor of biodiesel which exceeds industry standards. HERO BX's products reduce carbon emissions, create jobs in the United States, promote energy security and serve the community. **HERO BX has a general interest in supporting the growth of biodiesel and Bioheat® and has contributed to trip planning.**

Incobrasa Industries, Ltd. is a privately-owned corporation that receives and processes soybeans year-round at their production facility in central Illinois. They manufacture and ship soybean-derived products in the domestic market including biodiesel, animal feed, and bottled vegetable oil. The company's roots and industry experience go back about 50 years when its founders started operations in soybean oil extraction in Brazil. Using the most current technology, Incobrasa is committed to producing top quality B100 and B99.9 biodiesel for use in the United States. Incobrasa has the capacity to produce 36 million gallons annually. **Incobrasa contributed to tour planning and has been invited to accompany the tour group.**

Minnesota Soybean Processors is a 2,300 plus membership cooperative that owns and operates a soybean crush facility and 41 million gallon per year biodiesel operation in Brewster, Minnesota. Their goal is to provide a high-quality feed product for America's producers and a high-quality renewable fuel source. **Minnesota Soybean Processors has contributed to planning the tour and has been invited to accompany the tour group.**

Renewable Biofuels (RBF) owns and operates the BQ9000 certified, multi-feedstock RBF Port Neches Facility in Texas - the largest biodiesel production facility in North America - which became operational in December 2008. RBF has been serving wholesale biodiesel customers for over 10 years and has, in that time, developed a reputation for consistently and efficiently delivering the highest quality biodiesel. **RBF has contributed to tour planning and has been invited to accompany the tour group.**

Renewable Energy Group, Inc is a leading provider of cleaner, lower carbon intensity products and services. They are an international producer of biomass-based diesel, a developer of renewable chemicals and North America's largest producer of advanced biofuel. REG utilizes an integrated procurement, distribution, and logistics network to convert natural fats, oils, greases and sugars into lower carbon intensity products.
