Dear Ms. O'Brien:

Pursuant to House Rule 25, clause 5(d)(2), the Committee on Ethics hereby approves your proposed trip to France,¹ scheduled for October 8 to 12, 2023, sponsored by Foundation for Nuclear Studies.

You must complete an Employee Post-Travel Disclosure Form (which your employing Member must also sign) and file it, together with a Sponsor Post-Travel Disclosure Form completed by the trip sponsor, with the Clerk of the House within 15 days after your return from travel. As part of that filing, you are also required to attach a copy of this letter and both the Traveler and Primary Trip Sponsor Forms (including attachments) you previously submitted to the Committee in seeking pre-approval for this trip. If you are required to file an annual Financial Disclosure Statement, you must also report all travel expenses totaling more than \$480 from a single source on the "Travel" schedule of your annual Financial Disclosure Statement covering this calendar year. Finally, Travel Regulation § 404(d) also requires you to keep a copy of all request forms and supporting information provided to the Committee for three subsequent Congresses from the date of travel.

Because the trip may involve meetings with foreign government representatives, we note that House employees may accept, under the Foreign Gifts and Decorations Act (FGDA), gifts "of minimal value [currently \$480] tendered as a souvenir or mark of courtesy" by a foreign government. Any tangible gifts valued in excess of minimal value received from a foreign government must, within 60 days of acceptance, be disclosed on a Form for Disclosing Gifts from Foreign Governments and either turned over to the Clerk of the House, or, with the written approval of the Committee, retained for official use.

¹ Please be aware that the Committee's review of the proposed trip does not extend to either the security situation in the destination country or security related to foreign travel in general. We recommend you contact the Office of House Security (OHS) for a safety and security briefing prior to your departure. OHS may be reached at (202) 226-2044 or ohsstaff@mail.house.gov. House travelers should also register for the U.S. State Department's Smart Traveler Enrollment Program at <https://step.state.gov>.

If you have any further questions, please contact the Committee's Office of Advice and Education at extension 5-7103.

Changing clothes is required to get into the plant

Tuesday, October 10, 2023

Orano's La Hague site is located on the western tip of the Cotentin Peninsula in Normandy. The facility recycles used nuclear reactor fuel, harvesting the uranium and plutonium and conditioning the waste for final disposal. La Hague is subject to controls by French governmental agencies and international organizations which audit operations and perform scheduled and random inspections. In addition, Orano La Hague personnel perform daily inspections to ensure compliance with regulations.

9:30 am- 10:00 am Dry unloading facility

The Tour of the facility will help staffers better understand how other countries handle used fuel. Most used fuel that has undergone initial cooling is transferred to dry storage systems; cask-based storage is the most common dry system. Storage casks may be housed at the reactor site, such as in the United States, or at a centralized facility. In order for fuel to be transferred, it must meet strict radiological, thermal and chemical requirements. Dry storage casks typically hold about 20 fuel assemblies and are cooled by natural circulation. There has not been any significant radioactive release from used nuclear fuel in dry cask storage.

10:15 am – 10:45 am Storage pool for spent fuel

Following the Dry Unloading, we will see the storage pools for spent fuel at Orano group headquarters for recycling activities. The La Hague site offers its French and foreign customers a solution for them to re-use 96% of recoverable materials contained in the used nuclear fuel and safely conditioning the remaining 4% final waste.

Orano La Hague has 58 reactors, and the facility works in many other countries including Germany, Japan, Switzerland, Belgium, the Netherlands and Italy.

11:00 am – 11:30am Vitrification facility

Along the tour we will also learn about vitrification, and why it is important. Vitrification is the mixing of liquid radioactive wastes with glass-forming materials that are then heated using a high-temperature melting process. The process incorporates the waste into the glass itself that is then poured into canisters where it is allowed to solidify and cool.

Tuesday, October 10, 2023**11:45 am -12:30 pm Tour of the Control Room of UP3 plant**

Our tour will end with a visit to the Control Room of the UP3 plant. This room is used as the main control center in the plant. The plant operating supervisor and senior operating personnel operate and monitor major plant equipment.

We will see the entire room, including equipment indicators and controls that are organized by system. We will view the Annunciators (small windows) with a sound alarm that are placed above the control board or at the top part of the control board. The plant computer is also used to provide alarms alerting the operator to problems.

12:30 pm Transfer to “Le Moulinet” guesthouse**12:45 pm Lunch Discussion at “Le Moulinet” Guesthouse**

Frederic Leconte, a senior official of the Orano La Hague facility, will join for lunch. Mr. Leconte will open a Q&A discussion, during which the delegation will have the unique opportunity to ask questions about the tour, the facility, and the activities that occur.

- 10:15 am – 11:00 am **Presentation of the site and activities**
- 11:00 am -12:15 pm **Visit of Chalon/Saint Marcel facility**

The visit will allow the group to see the site that offers two advantages: excellent facilities for loading and transporting heavy components on the Saone River; and its proximity to other group sites. Since its completion in 1975, the Chalon/St. Marcel facility has manufactured all the heavy components for French pressurized water reactors (PWRs) ranging from 900 MW to 1500 MW. It has also completed a significant number of export contracts to make it a world leader.

Nearly 600 heavy components (reactor vessels, steam generators, pressurizers and closure heads) have been manufactured or are currently being manufactured since the plant opened in 1975.

Wednesday, October 11, 2023

The plant is at the heart of the manufacturing chain for nuclear steam supply systems (NSSS). The basic activities performed at Chalon/St. Marcel are metalworking and heavy machining. These activities are carried out in strict compliance with nuclear safety rules. The availability of all these skills, brought together on a single site and applied to heavy NSSS components, allows Chalon/St. Marcel undeniable advantages in terms of quality and competitiveness.

- 11:00 am Tour begins - The delegation will tour the Chalon-St Marcel Manufacturing Shop floor which covers roughly 40,000 square meters of workshops. This will be an active walking tour with stops at the following locations to view key aspects of the manufacturing process.
- 11:15 am – 11:30 am Welding School – Training area for highly skilled component welding
- 11:30 am – 12:00pm Three active work bays:
- Light bay (50 tons) – Preparation of parts in light span
 - Medium bay (350 tons) – Gradual assembly of components
 - Heavy bay (600 tons) – Final assembly of large components with direct access to the shipping dock
- 12:00 pm – 12:15 pm Multimodal Shipping Platform – Finished components are loaded onto transport ships to be moved down the Seine River. Tour concludes.
- 12:15 pm **Lunch Program on site at Saint Marcel**

Ms. Hillary O'Brien
House Science Committee
2321 Rayburn House Office Building
Washington, DC 20515-6115

Dear Ms. O'Brien,

Because you have nuclear energy policy in your portfolio for the House Science Committee, the Foundation for Nuclear Studies (FNS) invites you to participate in an educational trip to France to learn about French nuclear operations. France is a world leader in nuclear and a model for the U.S. as we strive to increase nuclear energy production, manage spent fuel, and grow our exports of nuclear technology and equipment.

Due to its commitment to using nuclear early on, France derives 80% of its electricity from nuclear energy. France also has the most advanced spent fuel recycling operation in the world. Lastly, France manufactures special heavy equipment not made anywhere else and is a leading exporter of nuclear components.

The proposed agenda for the trip is attached. Our first stop will be in Normandy for an overview of the French nuclear program and the history of French and U.S. cooperation. Then we will visit Orano's La Hague facility which is the world leader in used fuel treatment and recycling and a model of technology for several countries. Finally, we will visit Framatome's Chalon facility where they manufacture all the heavy components for French pressurized water reactors and are a world export leader in component manufacturing. We will end each day with an educational briefing by nuclear experts, plant officials and government representatives.

FNS was founded in 2001 to educate and inform policymakers and their staff about nuclear science and technology. We achieve this through educational briefings, seminars, 20-1 discussions with government officials, and plant tours. You will come away from this trip with an understanding of how France became the world leader in nuclear and how the U.S. can learn from and cooperate with French industry to advance our nuclear program and meet our ambitious carbon reduction and climate goals.

If you have any questions or require more information, please call me at 202-744-6077. Thank you for your interest in nuclear and FNS.

Kind regards,
