FNS France Trip**April 5-10, 2026****Draft Agenda****Sunday, 5 April PM** - Depart Washington IAD on overnight flight**Monday, 6 April AM** – Arrive in Paris. Government and industry meetings; dinner; overnight stay.**Tuesday, 7 April**

8:00am – Breakfast on your own at hotel

9:00am – Bus transfer to Framatome’s Saint-Marcel site

Framatome’s Saint-Marcel site (Saône-et-Loire, France) assembles the heavy equipment (vessels, steam generators, pressurizers, legs) that comprises the primary loop of nuclear reactors and assembles most of the heavy equipment for the French nuclear industry’s reactors between 900 MW and 1,600 MW capacity.

10:00 am – 10:15 am **Welcome at Chalon/Saint Marcel process through security**

Rue Louis Alphonse POITEVIN, ZI Portuaire Sud – Zone F 71380 SAINT MARCEL

10:15 am – 11:00 am **Presentation of the site and activities – Peggy Lucas, Director of Site Visits**11:00 am -12:15 pm **Visit of Chalon/Saint Marcel facility – Peggy Lucas, Director of Site Visits**

Framatome’s Chalon/Saint Marcel facility offers two advantages: excellent facilities for loading and transporting heavy components on the Saone River; and its proximity to other group sites. Since its completion in 1975, the Chalon/St.

Marcel facility has manufactured all the heavy components for French pressurized water reactors (PWRs) ranging from 900 MW to 1500 MW. It has also completed a significant number of export contracts to make it a world leader. Nearly 600 heavy components (reactor vessels, steam generators, pressurizers and closure heads) have been manufactured or are currently being manufactured since the plant opened in 1975.

The plant is at the heart of the manufacturing chain for nuclear steam supply systems (NSSS). The basic activities performed at Chalon/St. Marcel are metalworking and heavy machining. These activities are carried out in strict compliance with nuclear safety rules. The availability of all these skills, brought together on a single site and applied to heavy NSSS components, allows Chalon/St. Marcel undeniable advantages in terms of quality and competitiveness.

The delegation will tour the Chalon-St Marcel Manufacturing Shop floor of roughly 40,000 square meters of workshops. This will be an active walking tour with stops at the following locations to view key aspects of the manufacturing process.

11:15 am – 11:45 am Welding School – Training area for highly skilled component welding

11:45 am – 12:15pm Three active work bays:

- Light bay (50 tons) – Preparation of parts in light span
- Medium bay (350 tons) – Gradual assembly of components
- Heavy bay (600 tons) – Final assembly of large components with direct access to the shipping dock

12:15 pm – 12:45 pm Framatome Technical School – Tour participants will learn how research and development is conducted on the manufacturing process to maintain the utmost degree of excellence and efficiency.

12:45 pm – 1:00 pm Multimodal Shipping Platform – Finished components are loaded onto transport ships to be moved down the Seine River. Tour concludes.

1:00 pm – 2:30 pm **Lunch Program on site at Saint Marcel - Matthieu Cazalet, Director of Market Strategy, Framatome Projects & Components Manufacturing**

The Director of Operations for the facility will provide a review of what participants saw on the tour and answer questions.

Wednesday, 8 April – Tour Tricastin, dinner, overnight stay Avignon

FNS has never visited these next two facilities, so we are still waiting for the minute to minute description of the tours. We will furnish these details as soon as possible.

Orano Tricastin is an expert in uranium conversion and enrichment and in fluorine chemistry. It is one of the largest industrial platforms in Europe and is located in two Departments (Drôme and Vaucluse). Orano Tricastin carries out the chemistry (conversion, defluorination and denitration) and uranium-enrichment activities at the site that precede the final stage in the manufacture of fuel assemblies for reactors in nuclear power plants across the world. This plant showcases what Orano intends to build at Oak Ridge.

Thursday, 9 April – Tour Marcoule, train to Paris, dinner, overnight stay

In France, nuclear energy was developed largely at **Marcoule**. The French government chose this site in 1955 to build the nuclear reactors used to produce plutonium for the atomic bomb as well as the first plutonium recycling plant. Over time, Marcoule has become a veritable dismantling laboratory. The highly complex operations in progress constantly call for the invention of new processes and technologies that will simplify the dismantling of all types of nuclear facilities in the future.

Friday, 10 April AM – industry/government meetings or depart for DC

February 26, 2026

Dear Congressional Staff Colleague,

Because you have nuclear energy policy in your portfolio or work for a Committee of Jurisdiction or Member of Congress on a Committee of Jurisdiction, the Foundation for Nuclear Studies (FNS) invites you to participate in an educational trip to France to learn about French nuclear operations. France is a world leader in nuclear and a model for the U.S. as we strive to increase nuclear energy production, manage spent fuel, and grow our exports of nuclear technology and equipment.

Due to its commitment to using nuclear early on, France derives 80% of its electricity from nuclear energy. France is a leader in reprocessing spent fuel and also has uranium enrichment operations critical to the nuclear energy fuel supply chain. Lastly, France manufactures special heavy equipment not made anywhere else and is a leading exporter of nuclear components, something the U.S. strives to compete in.

The draft agenda for the trip is attached. Our first stop will be [Framatome's Chalon Saint Marcel](#) facility where they manufacture all the heavy components for French pressurized water reactors and are a world export leader in component manufacturing. Next, we head to Avignon where we will tour [Orano's Tricastin](#) facility to learn about Uranium Enrichment. Then we head to Orano's nearby Marcoule facility where they produce [Mox fuel](#) assemblies which supply light water reactors for electricity production. Marcoule is also an integral part of the world's largest nuclear [dismantling project](#). We will end each day with an educational briefing by nuclear experts, plant officials and government representatives.

FNS was founded in 2001 to educate and inform policymakers and their staff about nuclear science and technology. We achieve this through educational briefings, seminars, 20-1 discussions with government officials, and plant tours. You will come away from this trip with an understanding of how France became the world leader in nuclear and how the U.S. can learn from and cooperate with French industry to advance our nuclear program and meet our ambitious carbon reduction and climate goals.

If you have any questions or require more information, please call me at 202-744-6077. Thank you for your interest in nuclear and FNS.

Kind regards,

Mr. Calvin Huggins
Committee on Energy & Commerce
2125 Rayburn House Office Building
Washington, DC 20515

Dear Mr. Huggins:

Pursuant to House Rule 25, clause 5(d)(2), the Committee on Ethics hereby approves your proposed trip to France,¹ scheduled for April 5 to 10, 2026, sponsored by the Foundation for Nuclear Studies.

You must complete an Employee Post-Travel Disclosure Form (which your employing Member must also sign) and file it, together with a Sponsor Post-Travel Disclosure Form completed by the trip sponsor, with the Clerk of the House within 15 days after your return from travel. As part of that filing, you are also required to attach a copy of this letter and both the Traveler and Primary Trip Sponsor Forms (including attachments) you previously submitted to the Committee in seeking pre-approval for this trip. If you are required to file an annual Financial Disclosure Statement, you must also report all travel expenses totaling more than \$525 from a single source on the "Travel" schedule of your annual Financial Disclosure Statement covering this calendar year. Finally, Travel Regulation § 404(d) also requires you to keep a copy of all request forms and supporting information provided to the Committee for three subsequent Congresses from the date of travel.

Because the trip may involve meetings with foreign government representatives, we note that House employees may accept, under the Foreign Gifts and Decorations Act (FGDA), gifts "of minimal value [currently \$525] tendered as a souvenir or mark of courtesy" by a foreign government. Any tangible gifts valued in excess of minimal value received from a foreign government must, within 60 days of acceptance, be disclosed on a Form for Disclosing Gifts from Foreign Governments and either turned over to the Clerk of the House, or, with the written approval of the Committee, retained for official use.

¹ Please be aware that the Committee's review of the proposed trip does not extend to either the security situation in the destination country or security related to foreign travel in general. We recommend you contact the Office of House Security (OHS) for a safety and security briefing prior to your departure. OHS may be reached at (202) 226-2044 or ohsstaff@mail.house.gov. House travelers should also register for the U.S. State Department's Smart Traveler Enrollment Program at <https://step.state.gov>.

If you have any further questions, please contact the Committee's Office of Advice and Education at extension 5-7103.

Sincerely,

Michael Guest
Chairman
