**12. Sponsor's interest in the subject matter and role in organizing the trip:**

Center Forward's Innovation Conference is being convened to bring together a bipartisan group of senior legislative staffers from the House of Representatives to discuss innovation and development in America's technology sector and applications of emerging technologies in critical industries, and how the federal government can foster business growth and further scientific progress. Center Forward's organizational mission is to provide pragmatic policymakers the information they need to craft common-sense solutions and provide support in turning those ideas into results. Center Forward brings together Members of Congress, their staffs, not-for profits, academic experts, trade associations, corporations, and unions to find common ground.

Center Forward is the sole organizer of the trip. Center Forward is planning the conference and is responsible for the organization and execution of the event logistics as well as the programming content. Discussion topics will include frontier artificial intelligence development, artificial intelligence applications in research and commercial operations, telecommunications infrastructure and wireless network infrastructure, renewable energy generation and grid management, automation in sensitive manufacturing and supply chain sectors, transportation safety regulations, and health and consumer safety for artificial intelligence. Conference attendees will be senior legislative staffers from House member offices, and will speak with researchers, engineers, business leaders, and startup founders in the Seattle area.
